

While herding
the family's livestock,
two children encounter
a landmine.

One survives. One does not.
The survivor has lost a leg.

Survivor can't
walk to school.
He's isolated
from friends &
opportunities.

Sister is pulled out
of school to care for him.
Both instantly reduce
lifetime earning potential.

Low education level
of community = less
industry & low
quality of life.

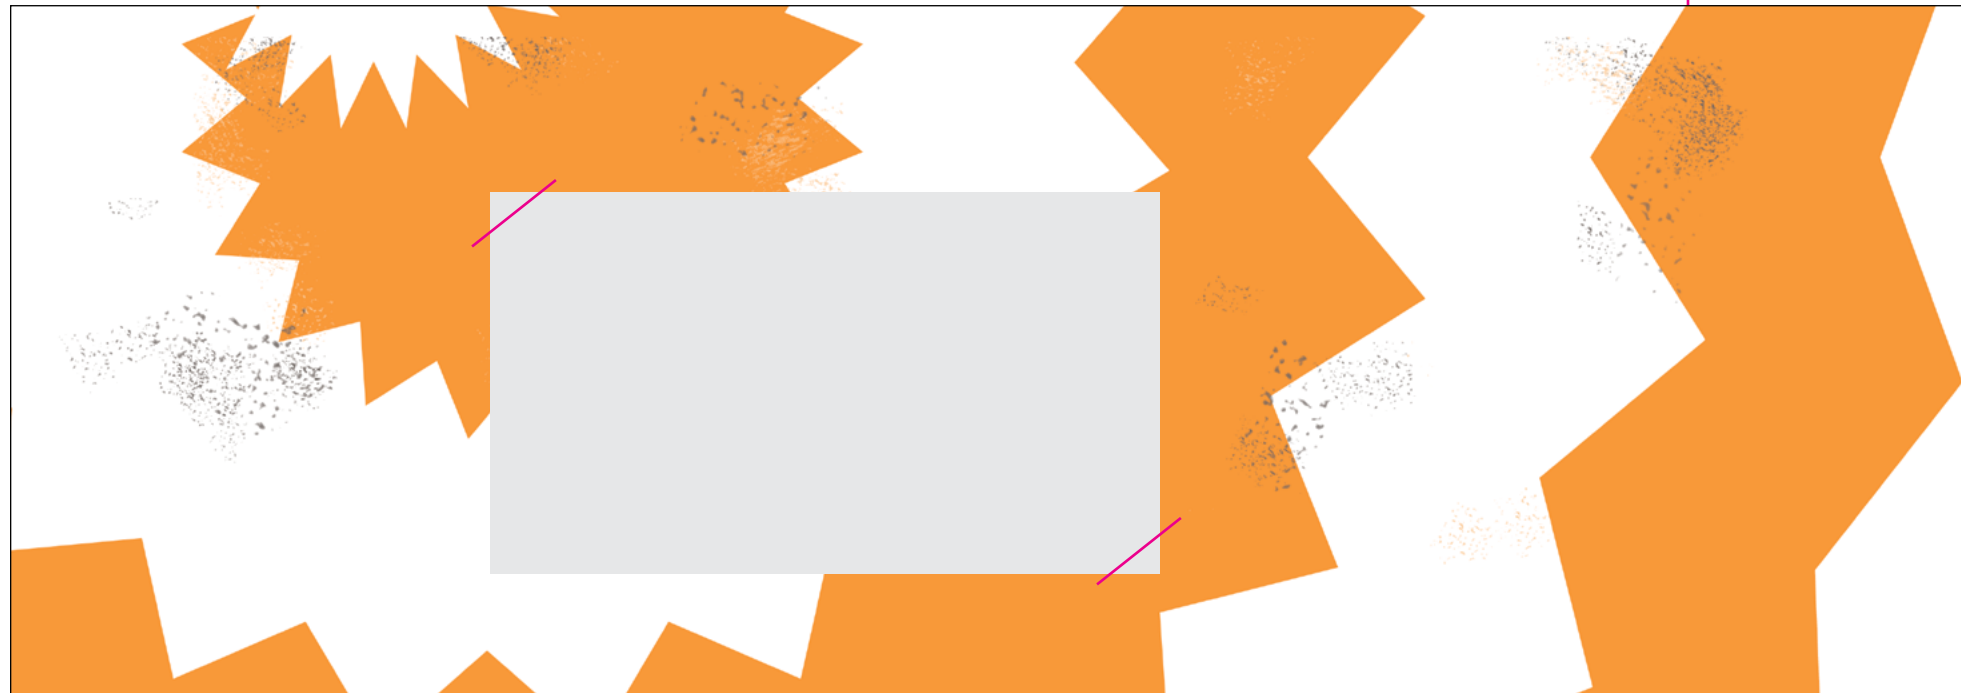

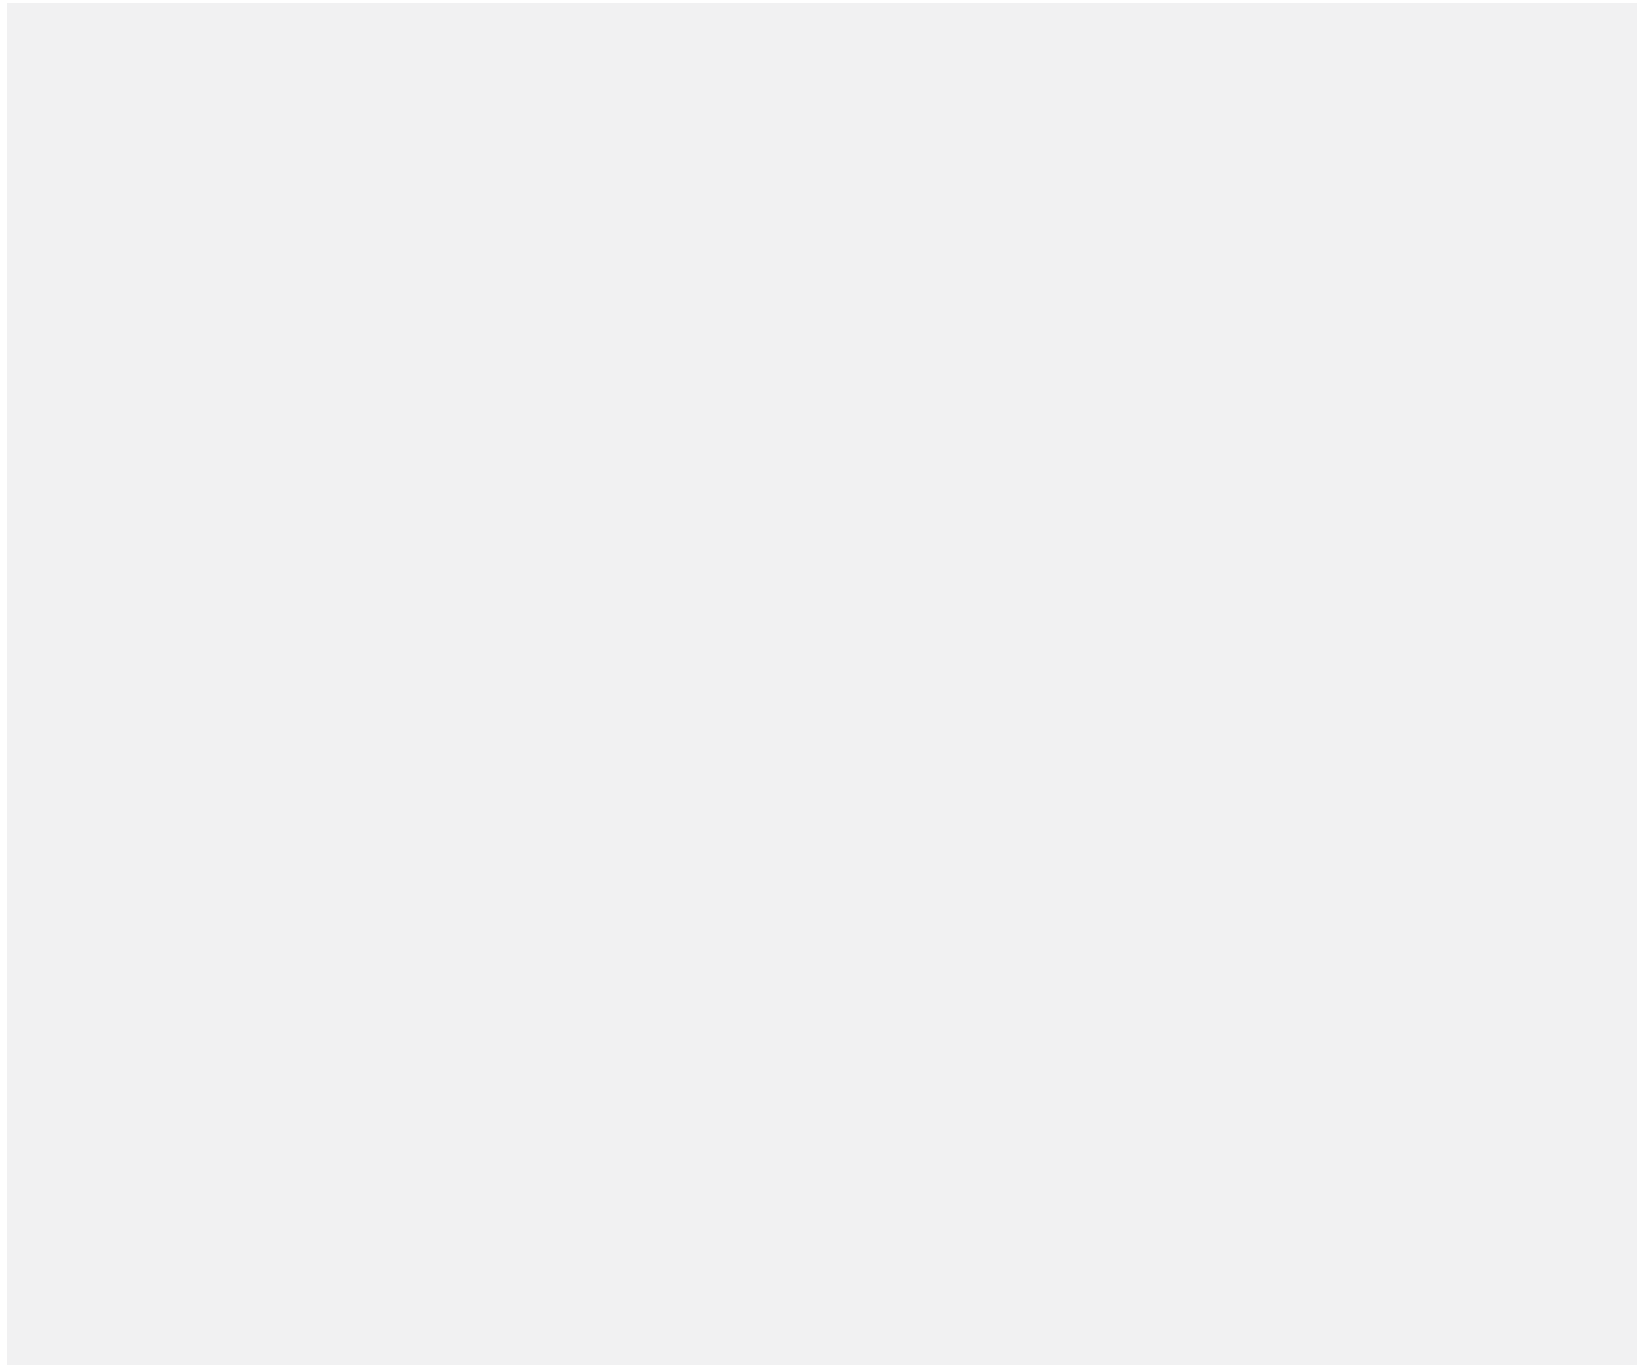

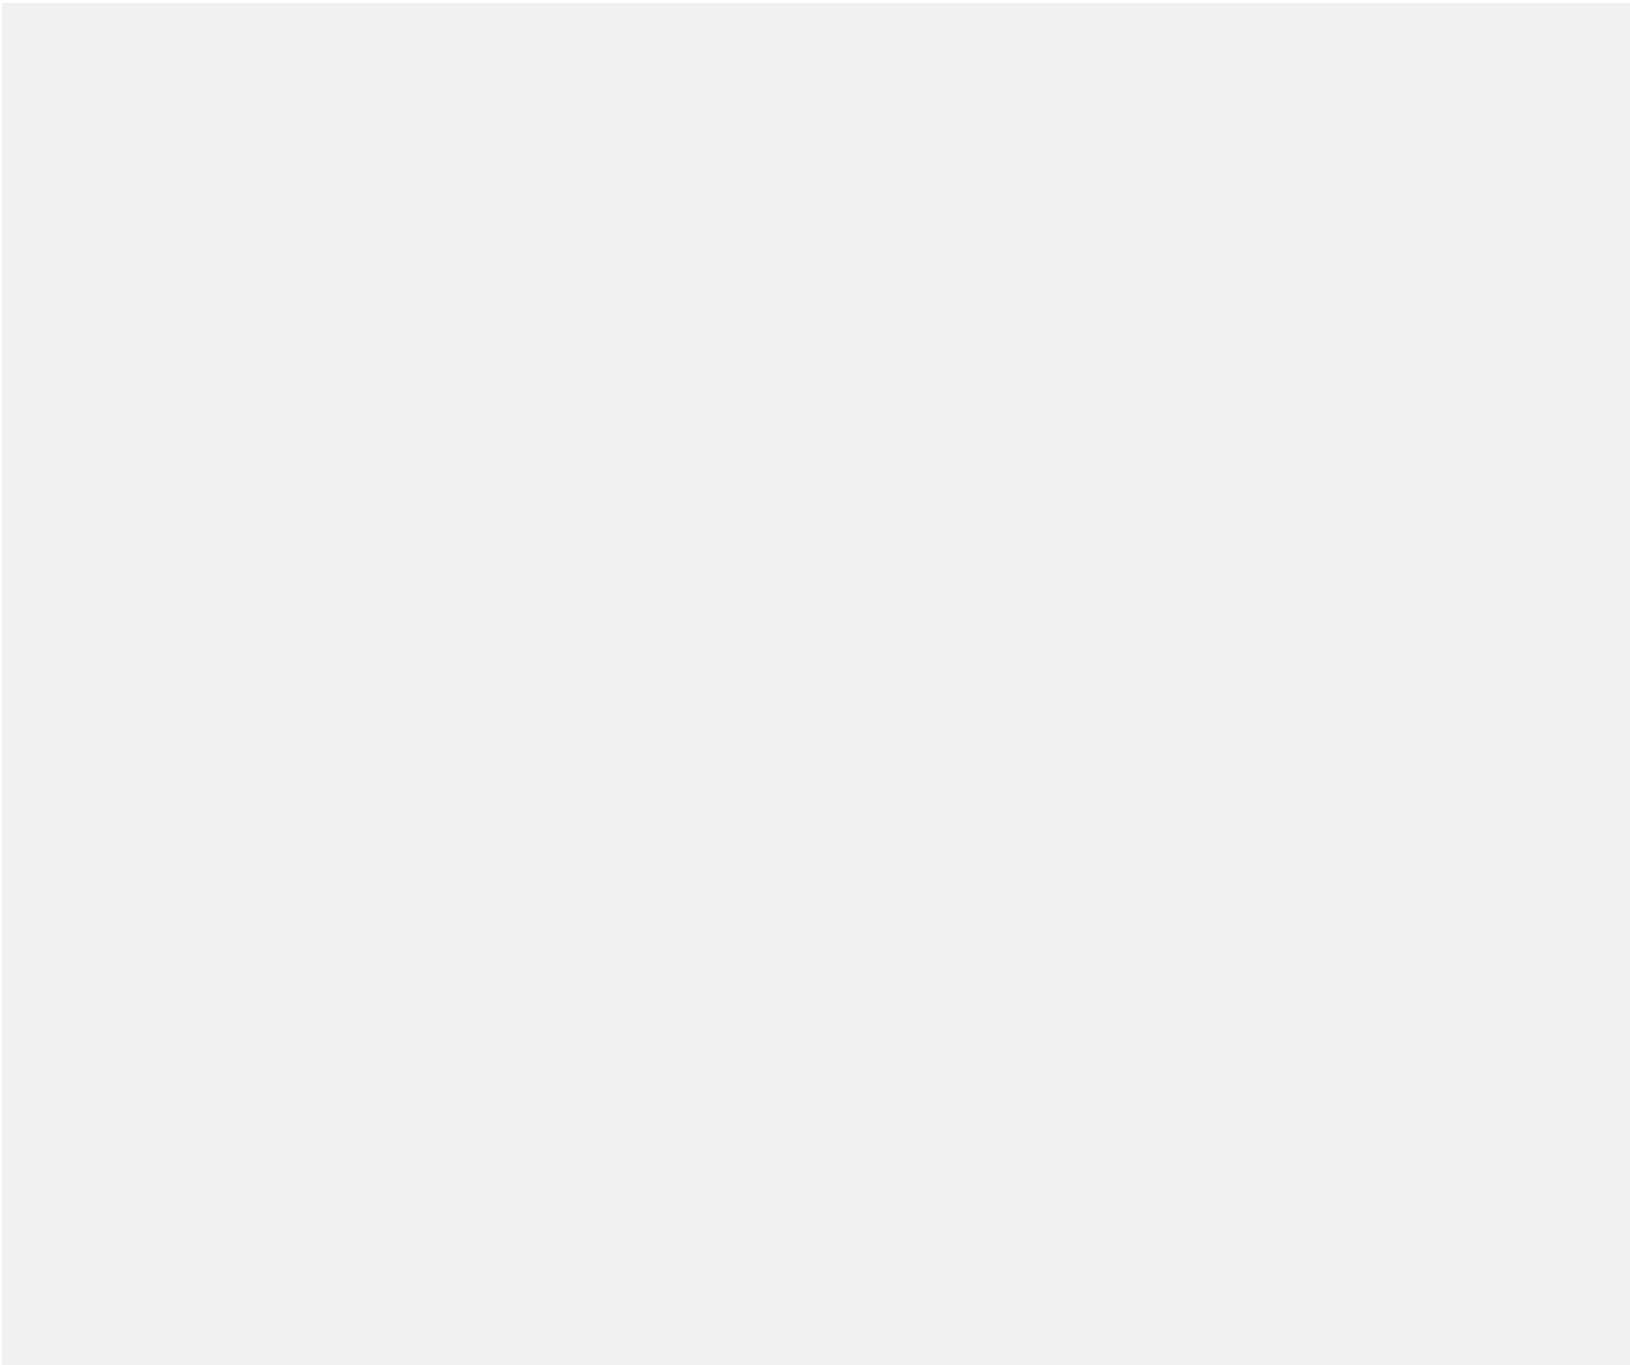

Country remains poor
because of increased
demands on limited
infrastructure.

GET THE IDEA? WE CAN FIX THIS.

LIFE'S MOST BASIC NEED: SAFETY

Landmines, cluster bombs and explosive remnants of war are indiscriminate weapons that injure and kill civilians in every corner of the globe, every day. They don't recognize ceasefires and claim victims long after conflicts end. The ripple effect on individuals, families, communities and countries is devastating.

The good news: we know how to fix this. But we need your help now.
